

# CIVIC CENTER HVAC/UPDATE

*Funds Allocated:*

**\$5,500,000**

*Any funds not used for the HVAC will be used for interior updates.*

## The facts:

- ✓ HVAC system in the Civic Center has reached the end of its life
- ✓ Most of the HVAC equipment is original to the building built in the 1960's.
- ✓ Boiler and chillers are currently being replaced.
- ✓ Air handlers and controllers need replaced

***The Muskogee Civic Center is a hub of activity, bringing the community together for events, gatherings, and celebrations. However, to maintain this vital role, we must address a critical need - a new HVAC system. Without proper heating and cooling, the comfort and safety of our attendees are at risk, jeopardizing the success of future events. We must ensure that our venue remains a place where memories are made, connections are forged, and experiences are unforgettable.***
